

VinTech Corp IT Onboarding Guide

VinTech Corp • Internal Document • Doc No. OPS-001 • Version 1.0

1. Purpose

This guide describes the IT setup steps for new employees joining VinTech Corp, including account provisioning, hardware issuance, and software installation.

2. Account Provisioning

Before an employee's start date, IT creates a Company email account, single sign-on (SSO) profile, and access to core systems such as the HR portal and internal wiki, based on the access request submitted by the hiring manager.

3. Hardware Issuance

On the first day, new employees receive a Company laptop, a charger, and a headset from the IT desk. Employees are asked to sign an equipment acknowledgment form confirming receipt of the assigned hardware.

4. Software Installation

IT pre-installs standard software, including the Company VPN client, endpoint security agent, collaboration tools, and any role-specific applications requested by the employee's department.

5. Remote Work Equipment

For employees with work from home arrangements, the Company provides a laptop and a one-time home-office setup allowance to help cover the cost of items such as a monitor, chair, or desk. Employees should confirm their work-from-home arrangement with their manager before requesting this equipment.

6. Security Requirements

All Company devices must have disk encryption and the endpoint security agent enabled before being used to access Company systems. Employees must report lost or stolen devices to IT immediately.

7. Getting Help

Employees experiencing IT issues can submit a ticket through the internal helpdesk portal or contact the IT support desk directly for urgent issues.
