

VinTech Corp Performance Review Process

VinTech Corp • Internal Document • Doc No. HR-007 • Version 1.0

1. Purpose

This document describes VinTech Corp's performance review cycle, rating scale, and the factors used to evaluate employee performance.

2. Review Cycle

Performance reviews are conducted quarterly. Each cycle includes a self-assessment, manager assessment, and a calibration discussion within the department to ensure consistency across teams.

3. Rating Scale

Employees are rated on a 5-point scale: 1 (Unsatisfactory), 2 (Needs Improvement), 3 (Meets Expectations), 4 (Exceeds Expectations), and 5 (Outstanding). Ratings are documented in the HR system and discussed directly with the employee.

4. Evaluation Factors

Performance is evaluated based on project outcomes and competency assessments only. Overtime hours worked are NOT a factor in performance ratings, and employees should not treat working additional hours as a substitute for delivering agreed outcomes.

5. Goal Setting

At the start of each quarter, employees and managers agree on 3-5 key goals aligned with team and Company objectives. Progress against these goals forms the primary basis for the next review.

6. Development Plans

Where a rating of 1 or 2 is given, the manager and employee jointly create a development plan with specific, time-bound improvement actions, reviewed at the next cycle.

7. Link to Compensation

Ratings feed into annual compensation review discussions but do not automatically determine salary changes, which also account for market benchmarks and budget availability.
