

VinTech Corp Workplace Safety Guidelines

VinTech Corp • Internal Document • Doc No. HR-009 • Version 1.0

1. Purpose

These guidelines describe general workplace safety expectations and the process for reporting hazards at any VinTech Corp office location.

2. General Safety Rules

Employees must keep walkways and emergency exits clear, follow posted fire evacuation routes, and use office equipment (e.g. kitchen appliances, standing desks) as intended by the manufacturer.

3. Reporting Hazards

Any employee who notices a potential hazard, such as a loose cable, faulty equipment, or a spill, should report it immediately to Facilities via the internal helpdesk portal, or flag it verbally to office reception for urgent cases.

4. Incident Reporting

Workplace injuries, however minor, must be reported to the employee's manager and to HR within 24 hours, using the workplace incident form available on the HR portal.

5. Fire Safety and Evacuation

Each office conducts a fire evacuation drill at least twice per year. Employees must familiarize themselves with the evacuation map posted on their floor and the designated assembly point.

6. Ergonomics

Employees experiencing discomfort from their workstation setup may request an ergonomic assessment through Facilities, which can recommend adjustable chairs, monitor arms, or other equipment.

7. Emergency Contacts

Each office displays emergency contact numbers, including local emergency services and the Facilities on-call contact, near the main entrance and pantry areas.
