

# VinTech Corp Data Processing Agreement — EU/GDPR Data Subjects

VinTech Corp • Internal Document • Doc No. LEG-007 • Version 1.0

## 1. Purpose and Scope

This Data Processing Agreement (DPA) applies specifically to personal data belonging to data subjects located in the European Union (EU) and European Economic Area (EEA), supplementing the general Data Privacy Policy with GDPR-specific obligations.

## 2. Roles

For EU customer data, VinTech Corp acts as a data processor on behalf of its business customers (the data controllers), and processes personal data only on documented instructions from the controller.

## 3. Lawful Basis

Processing of EU personal data relies on the lawful bases described in the applicable customer contract, typically contractual necessity or the controller's legitimate interest.

## 4. Data Subject Rights

EU data subjects may exercise rights of access, rectification, erasure, restriction, and portability. Requests received directly by VinTech Corp are forwarded to the relevant controller within 5 business days, in line with GDPR timelines.

## 5. Breach Notification — EU-Specific Timeline

For personal data breaches affecting EU data subjects, VinTech Corp notifies the relevant supervisory authority within 72 hours of becoming aware of the breach, consistent with the general 72-hour timeline in the Data Privacy Policy. In addition, where the breach is likely to result in a high risk to the rights and freedoms of affected individuals, VinTech Corp notifies those individuals directly "without undue delay," which may occur before, at the same time as, or shortly after the 72-hour supervisory authority notification, depending on the nature of the breach.

## 6. International Transfers

Transfers of EU personal data outside the EU/EEA are made only under an approved transfer mechanism, such as Standard Contractual Clauses, as documented in the relevant customer contract.

## 7. Sub-Processors

VinTech Corp maintains a current list of sub-processors used for EU personal data and notifies controllers of any intended changes in advance.
