

VinTech Corp Export Compliance Policy

VinTech Corp • Internal Document • Doc No. LEG-012 • Version 1.0

1. Purpose

This policy describes basic export control obligations that apply when VinTech Corp ships products or transfers technology internationally.

2. Export Control Basics

Certain software, technology, and encryption-related products may be subject to export control laws that restrict their transfer to specific countries, entities, or individuals.

3. Restricted Parties Screening

Before shipping products or granting system access to a new international customer or partner, the relevant team must run a restricted-party screening check through the tool provided by Legal.

4. Restricted Destinations

VinTech Corp maintains a list of countries and regions subject to export restrictions or sanctions. Shipments or software access to these destinations require prior approval from Legal.

5. Classification

Products are assigned an export classification by Legal in coordination with Engineering, which determines the specific restrictions that apply.

6. Employee Responsibilities

Employees involved in international sales, shipping, or granting product access must complete export compliance training and consult Legal when uncertain whether a transaction requires additional review.

7. Recordkeeping

Records of restricted-party screening and export approvals are retained for a minimum of 5 years, in line with applicable regulatory requirements.
