

VinTech Corp Business Continuity Plan

VinTech Corp • Internal Document • Doc No. OPS-008 • Version 1.0

1. Purpose

This plan provides a high-level overview of VinTech Corp's strategy for maintaining critical business functions during a significant disruption, such as a natural disaster, extended office closure, or major supplier failure.

2. Critical Functions

Business-critical functions identified for continuity planning include product infrastructure operations, customer support, payroll processing, and core sales operations.

3. Remote Operations

Given the Company's Remote Work Policy and cloud-based infrastructure, most critical functions can continue with staff working remotely in the event an office location becomes unavailable.

4. Roles and Responsibilities

A cross-functional Business Continuity Team, including representatives from Engineering, HR, Facilities, and Finance, is responsible for coordinating the Company's response during a continuity event.

5. Communication Plan

During a continuity event, the Business Continuity Team communicates with employees via the internal messaging system and, if internal systems are unavailable, via a pre-registered emergency SMS distribution list.

6. Relationship to Disaster Recovery

This plan operates at the business-process level, while the Disaster Recovery Plan addresses technical recovery of IT systems; the two plans are activated together for events affecting both.

7. Review and Testing

The Business Continuity Plan is reviewed annually and tested through a tabletop exercise involving the Business Continuity Team and department leads.
