

VinTech Corp IT Change Management Process

VinTech Corp • Internal Document • Doc No. OPS-010 • Version 1.0

1. Purpose

This process describes how changes to production IT systems are requested, reviewed, and approved at VinTech Corp.

2. Change Categories

Changes are classified as Standard (pre-approved, low-risk, repeatable changes), Normal (requires review and approval), or Emergency (urgent changes needed to resolve an active incident).

3. Requesting a Change

Normal changes are submitted through the change management system with a description of the change, rollback plan, and expected impact, at least 3 business days before the planned change window.

4. Approval

Normal changes require approval from the Change Advisory Board (CAB), which meets weekly to review submitted change requests. Standard changes are pre-approved and do not require CAB review each time.

5. Emergency Changes

Emergency changes needed to resolve an active incident, as defined in the Incident Response Playbook, may be approved by the on-call engineering manager without CAB review, but must be documented retroactively within 24 hours.

6. Change Windows

Normal changes to customer-facing production systems are scheduled during the designated weekly change window to minimize customer impact, except where business need requires otherwise.

7. Post-Change Review

All Normal and Emergency changes are reviewed at the next CAB meeting to confirm successful implementation and capture any lessons learned.
