

VinTech Corp Data Backup Policy

VinTech Corp • Internal Document • Doc No. OPS-012 • Version 1.0

1. Purpose

This policy describes backup frequency and retention rules for VinTech Corp's production systems and business data.

2. Backup Frequency

Production databases are backed up continuously via transaction log shipping, with a full snapshot taken daily. Non-database file storage is backed up daily.

3. Retention Schedule

Daily backups are retained for 30 days, weekly backups for 6 months, and monthly backups for 3 years, after which they are automatically deleted unless subject to a litigation hold under the Litigation Hold Procedure.

4. Backup Storage

Backups are stored in a geographically separate location from the primary production environment to protect against regional outages, supporting the recovery objectives defined in the Disaster Recovery Plan.

5. Backup Testing

IT performs a test restore from backup at least quarterly to confirm backup integrity and validate that recovery time objectives can be met.

6. Access Control

Access to backup systems and restore capability is restricted to designated IT and Engineering personnel, consistent with the access control principles in the Data Privacy Policy.

7. Employee Device Backup

Company laptops are configured to back up key folders (e.g. documents, desktop) to Company-approved cloud storage automatically; employees should avoid storing critical work files only on local disk.
