

# VinTech Corp Software License Compliance Policy

VinTech Corp • Internal Document • Doc No. OPS-011 • Version 1.0

## 1. Purpose

This policy describes rules for installing and using software on Company devices to ensure VinTech Corp remains compliant with software licensing terms.

## 2. Approved Software

Employees should install software from the Company's approved software catalog where possible. Software outside the catalog requires approval from IT before installation on a Company device.

## 3. License Types

The Company maintains a mix of per-seat licenses, site licenses, and open-source software. IT tracks license counts centrally to avoid exceeding purchased seat limits.

## 4. Personal Use Restriction

Company-licensed software may not be installed on personal devices or used for purposes outside of an employee's role at VinTech Corp, unless the license terms explicitly allow it.

## 5. Open Source Software

Use of open-source components in Company products must be reviewed against the Company's approved open-source license list; copyleft licenses with strong distribution requirements require Legal review before use.

## 6. Audits

IT conducts periodic software license audits across Company devices to identify unauthorized installations and reconcile license usage against purchased entitlements.

## 7. Non-Compliance

Installing unauthorized or unlicensed software on Company devices may result in the software being removed and, in serious cases, disciplinary action under the Employee Handbook.
