

VinTech Corp Vendor Onboarding Checklist

VinTech Corp • Internal Document • Doc No. OPS-004 • Version 1.0

1. Purpose

This checklist describes the onboarding steps for external vendors and contractors who require access to VinTech Corp systems or facilities, distinct from the employee IT onboarding process.

2. Contract and Compliance Prerequisites

Before any technical onboarding begins, the vendor must have a signed contract in place per the Vendor Contract Terms, and must have completed the restricted-party screening described in the Export Compliance Policy where applicable.

3. System Access

Vendors are provisioned with a limited-scope guest account, restricted to the specific systems required for their engagement, rather than the standard employee account created under the IT Onboarding Guide. Vendor accounts are set to automatically expire on the contract end date.

4. Hardware

Vendors generally use their own equipment. VinTech Corp does not issue Company laptops to vendors except in specific cases approved by IT and Procurement, and any issued equipment must be returned at the end of the engagement.

5. Facility Access

Vendors requiring physical access to office premises are issued a visitor or temporary contractor badge through Facilities, following the process in the Physical Security and Access Control policy, rather than a permanent employee badge.

6. Security Briefing

All vendors with system access must complete a short security briefing covering acceptable use and confidentiality obligations before their account is activated.

7. Offboarding

At contract end, IT and Facilities jointly confirm that vendor system access has been revoked and any issued badges or equipment have been returned.
